

## The Butterfly

The small and delicate wings of the butterfly carry symbolism in a variety of cultures and belief systems across the world. Irish, Mexican, and Native American cultures, Greek mythology and Christianity all mention the butterfly and believe that it is in some way connected to the heavens, representative of our soul or rebirth.

From their short and swiftly changing lifecycles to the thousands of miles they may fly in their little time in this world, they are tiny creatures that remind us of our life's journey and that we are never the same at the end as we were at the beginning.

Thank you for sharing this special time of remembrance with us. Heartfelt thanks to GT Butterfly House & Bug Zoo for loving care and assistance with today's butterflies and to the many Munson Healthcare Hospice Staff & Volunteers for their generous assistance in making these special events possible. We always welcome new volunteers. If you are interested, please call our Volunteer Coordinator, Crista Norman, at 800-252-2065.
