

Allergies: Unknown Upon Admission for Nurses

Cerner PowerChart EDUCATION

Documentation

If a patient is unable to provide allergy information at the time of admission and no caregiver is present or able to provide the information, enter Unknown Upon Admission as the patient's allergies. Nurses still need to complete the allergy reconciliation from the Adult or Pediatric Intake – Nursing workflow.

Allergy information needs to be entered in the patient's chart as soon as it becomes available.

- 1. On the dark blue menu, select Nurse View.
- 2. Select Adult or Pediatric Intake Nursing.
- 3. Select the Allergies header.
