

Documenting COVID-19 Status for Hospital Nurses

Cerner PowerChart Education

Updating COVID-19 Status

A COVID-19 Status Update Task is tasked upon admission AND when a new COVID-19 test is resulted.

1. From the Activities Column on CareCompass, click on the circle with number of tasks.
2. Choose the **COVID-19 Status Update Task**.
3. Select **Document**.

COVID-19 Status Update PowerForm

Update the COVID-19 Status to reflect the corresponding result while completing the PowerForm.

COVID-19 Status

COVID-19 Status Positive **Not suspected**
 suspected

When selecting the COVID-19 Status, consider these definitions

Suspected status is a:

- Symptomatic patient who has a negative COVID-19 test but the provider has a high suspicion for COVID-19 and is treating the patient as positive
- Or a patient born to a COVID-19 positive mother who has not yet been ruled out

Not suspected status is an:

- Asymptomatic patient who has a negative COVID-19 test
- Or has no clinical suspicion for COVID-19

Viewing COVID-19 Status

The status displays in Results Review under the Patient Assessment tab.
