

Interactive View: Documenting Birth for Secondary RN for Maternity Nurses

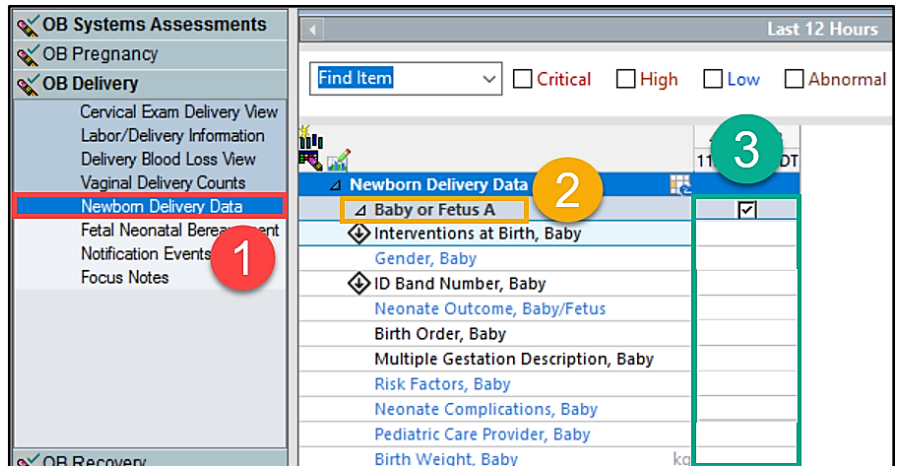

Cerner PowerChart EDUCATION

During delivery the Secondary RN documents results for the fetus or baby while the Primary RN documents results for the laboring mother. Documentation for the baby is completed in **both mother and baby charts**.

Documentation in Mother's Chart

Select the **Newborn Delivery Data** section within the OB Delivery band.

1. **Confirm correct dynamic group** is present.
 - a. This is automatically created when the pregnancy is added to the chart. See the Triage/Ante/Labor Workflow: Adding a Pregnancy document on the Hospital Maternity Nursing Triage/Ante/Workflow website page.

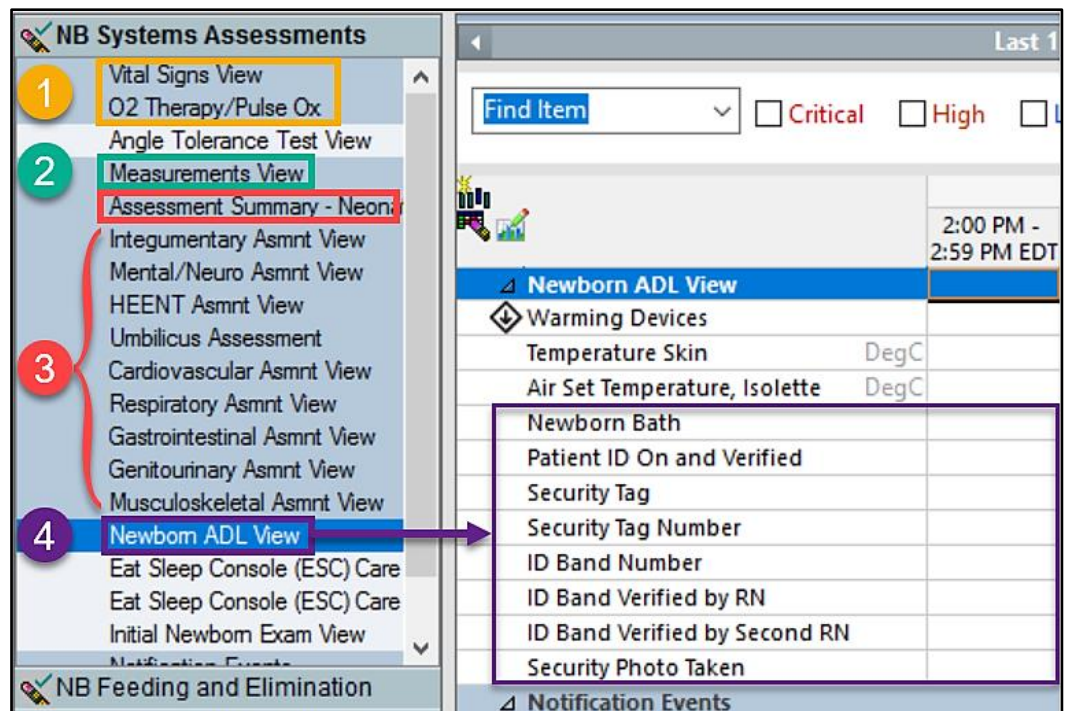

2. **Complete Documentation** including APGARs and measurements.

Documentation in Baby's Chart

Within the **NB System Assessment** band:

1. Document vital signs.
2. Document measurements (weight in kg).
3. Document assessment details starting with Assessment Summary.
4. Document in the Newborn ADL View, including:
 - a. Bath.
 - b. ID and HUGS tags.
 - c. Security photo.
