

## Interdisciplinary Plans of Care (IPOC): Customizing for Maternity Nurses

Cerner PowerChart

#### Overview

Although most IPOCs meet the needs of each patient, sometimes it is necessary to customize to capture the unique variations in each patient's care.

Prior to Initiation									
Prior to	o Initia When a prior to a. b.	tion an IPOC is entered, b initiation: Suggested outcomes, interventions, and indicators will be preselected. These can be unchecked if not appropriate for the patient's needs. Additional options for outcomes,	Pre-Selected Optional Selections	IPOC OB Coping       Image: Copy of the second	(Planned Pending)         Goal-Demonstrates Effective Coping Skills - Met         ***RISK FOR Anxiety/Altered Mood or Ineffective Coping r/t Pregnancy***         Recommend/Provide Diversional Activities - Done         Assess Support System for Effective Coping - Done         Patient Coping Postpartum for Goal: Effective Coping         Goal-Give Aqe/Cultural/Spiritual Appropriate Care - M         ***Chaplain Referral as Needed***         ***Provide Support Referrals as Appropriate***         Spiritual/cultural preferences - No or Yes         Goal-Experience Effective Coping r/t Fetal Loss - Met         Provide Grief Counseling as Needed - Done         Offer Memory Roy: Fetal Loss - Done	By Discharge By Discharge By Discharge			

interventions, and indicators may be selected as appropriate.

2. When finished click 😵 Initiate Now .

### View Excluded Components

- 1. After initiation of an IPOC and outcomes, interventions, and/or indicators need to be added, navigate to:
  - a. Orders.
  - b. Click on the appropriate IPOC to select.
  - c. Click on the View Excluded Components icon.

.

- d. Place a check mark in the corresponding box to select the available items.
- e. Click Sign

### Patient Specific Outcomes/Goals and Interventions

When customizing an IPOC at initiation or via View Excluded Components after initiation there is an option to create patient specific outcomes/goals and interventions.

- At the bottom of the selections, you will discover patient specific items. Click on the check boxes for the goal and the intervention.
- 2. Right click on the goal and select Modify.
  - a. Enter your patient specific goal in the description field.
  - b. Select 'By Discharge' from the Codified Duration dropdown.
- 3. Right click on the intervention and select Modify.
  - a. Enter your patient specific intervention in the description field.
- 4. Sign.
