

Interdisciplinary Plans of Care (IPOC): Initiating for Maternity Nurses

Cerner PowerChart

Definition

Interdisciplinary Plans of Care (IPOC) are designed to help guide nurses in creating an individualized, problem-based, plan of care that addresses goals, outcomes, and interventions for the patient during the process of care.

Expectations

- IPOCs should be initiated upon the patient's admission to the unit prior to orders being entered and prior to documentation.
 - o Only documentation charted after initiation of the IPOC will pull into the IPOC for evaluation.
- When patients are in labor the following two IPOCs are required:
 - IPOC OB Altered Comfort/Pain Management
 - o IPOC OB Coping

Initiating

- 1. From within the patient's chart, on the dark Menu, select Orders
- 2. Click Add.
- 3. In the Search window, type 'IPOC'.
- 4. Select the IPOC you want to create for your patient.
