

Orthotics/Prosthetics Consult Order Medical Record Request for MMC Nursing Staff

Cerner PowerChart EDUCATION

Medical Record Request (MRR) is used to print or fax orders and/or documents within PowerChart for an individual patient. If the Service Provider selected within the **Orthotics/Prosthetics Consult Order** is located at an outside facility, the consult order will need to be faxed utilizing a new MRR template.

Faxing the Orthotics/Prosthetics Consult Order using Medical Record Request (MRR)

- While in a patient chart, click **Medical Record Request** from the top PowerChart toolbar.
 - Note:** MRR is encounter specific. Always ensure the correct patient encounter is selected prior to using MRR.
- Select Event Status: **Verified and Pending**.
- Select the Template: **Orthotics Prosthetics Consult Order**.
- Select the Purpose: **Further Medical Care**.
- Date Range** is available to limit the patient information available within the Sections tab.
- In the **Related Providers** tab, select the radio button **Device selected**.
- Click on the **Sections** tab to select which areas of the patient chart to include in the template.
- Click the **Device** drop-down arrow and select the desired destination.
 - Note:** Mary Free Bed MHC does not need faxed consult orders at this time.
- Click **Send**.
- Check the status of the fax by clicking on the Submitted Requests tab.
