In this issue: [Changes to Urine Drug of Abuse Screen testing](#) February 2023, Vol. 3

Lori Clute MT(ASCP)  
William Kanner, MD  
Editors

Starting Wednesday 3/1/23, Munson Medical Center Laboratory will be removing PCP from our Urine Drugs of Abuse panel, and adding Fentanyl. In addition, Fentanyl Screen, Random Urine, and Buprenorphine Screen, Random Urine will now be offered as stand-alone tests to be performed at Munson Medical Center. Test codes are FENRU and BUPRU.

Detection limits for both tests will be 5 ng/mL. Test will not automatically be sent for confirmation. If confirmation is desired, please contact the laboratory within 2 weeks of collection to request that a confirmation test be forwarded to Mayo Laboratory.
