

Result Copy for Twins, Triplets, etc. for Maternity Nurses

Cerner PowerChart EDUCATION

Staff must be vigilant when performing result copy. It is imperative that each baby's information is result copied from the correct mother to the correct baby.

Process

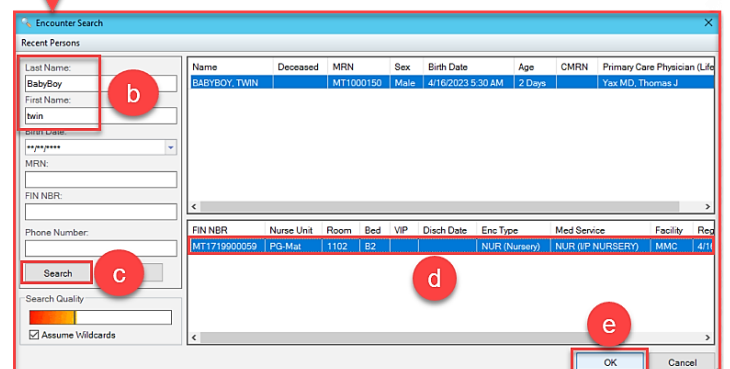

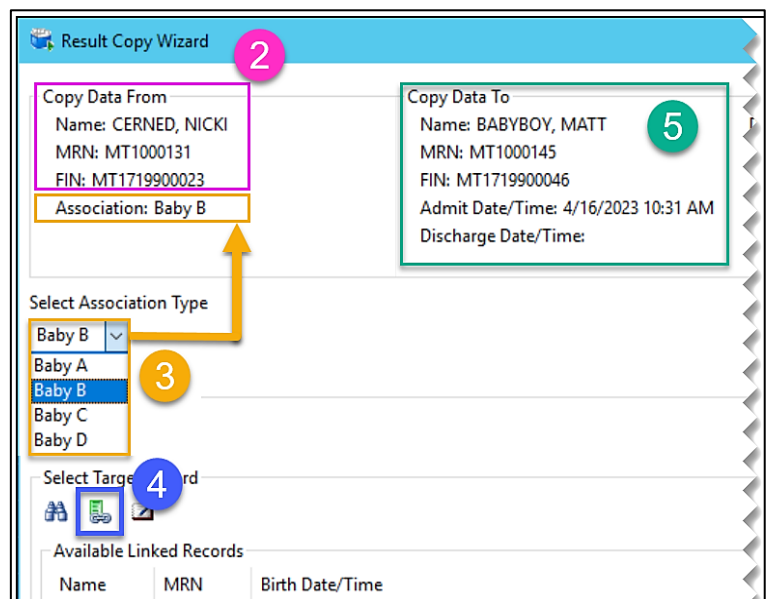

To prevent wrong data being copied to the wrong baby's chart:

1. Open the mother's chart, click **Result Copy**
2. Verify the correct mother's chart is listed.
3. Use the drop-down to **Select Association Type**.
4. Click the **Related Records Search** icon.
5. **VERIFY** the correct baby has been pulled forward.

If the information is not correct:

- a. Click the binoculars icon to search for the correct baby's chart.
- b. Enter the correct baby's name.
- c. Click Search.
- d. Select the encounter.
- e. Click OK.

6. Click **Next**.

7. Click **Next**.
