

Shift Summary Overview

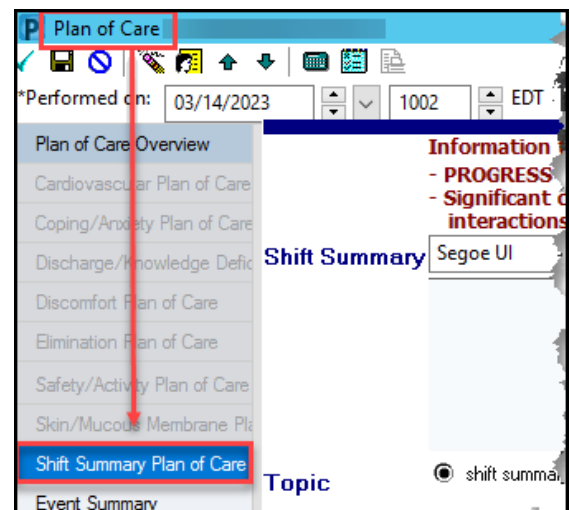

The Shift Summary is a PowerForm that allows the user to document:

- Progress to expected goals.
- Discharge plan and barriers to discharge.
- Significant changes in condition.
- Treatment plan.
- Pertinent activity.
- Psychosocial needs.
- Family interactions.

The Shift Summary is a required part of documentation in the Plan of Care task:

- Open the Plan of Care task from CareCompass (Activities Column).
- The task is assigned twice per day.
- The form can be also accessed from AdHoc.

Note: A user is required to document a Shift Summary on every patient for any shift that is 4 hours or more.

Select **Shift Summary Plan of Care**:

- Document the correct time and date in the Performed on fields.
- Read Information Text in red regarding what should be included in the chart.
- Document in the Shift Summary field.
- Sign.
