Ambulatory Organizer Patient Status Color Legend for Providers and Clinical Staff
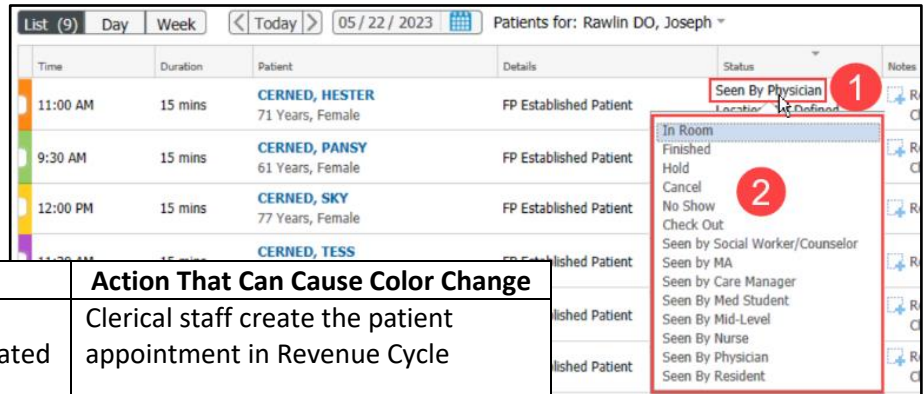

Cerner PowerChart Ambulatory **EDUCATION**

Patient Status Color Legend

The color of the status bar in the Ambulatory Organizer indicates the patient's status of the appointment. The color will update as a patient progresses through their clinic visit. The patient's status will change automatically based on actions completed within PowerChart or Revenue Cycle, but may also be adjusted manually.

To change a patient's status manually:
1. Select the patient's current status.
2. Select a new status.

Color Status	Definition	Action That Can Cause Color Change
	Indicates the patient's appointment has been created	Clerical staff create the patient appointment in Revenue Cycle
	Indicates the patient is: • Checked In	Patient has arrived for the appointment and is going through the check in process
