

## Tips and Tricks for Attending Service Transfer

1. The transferring attending provider will place the Change Attending Physician Task order.

2. The transferring attending provider **MUST** document in the appropriate daily progress note:
  - They discussed the case with the receiving service
  - The reason for the change of attending service
  - The receiving service has agreed to be the new attending service and accepted the patient
3. As a professional courtesy for accepting the patient, the transferring attending provider is responsible for resolving the CDI queries that are outstanding before the transfer.
