

Discharge Medication Reconciliation

1. Navigate to the Discharge - Provider MPPage within the Provider View.
2. Select the Home Medications Component.
3. Select Discharge.

Icons

- Icons to left of the medication name:
 - A white scroll indicates a home medication that's been documented, but not prescribed.
 - A hospital icon indicates a hospital medication.
 - A pill bottle icon indicates a prescription.
- Column icons:
 - indicates to continue the medication after discharge.
 - indicates do not continue the medication after discharge.
 - indicates create a new prescription.
- When **Continue Remaining Home Meds** is selected, the system will automatically select the column for all home medications.
- Click **Reconcile and Sign** or **Sign And Print** to finish the discharge medication reconciliation.

Discharge Medication Reconciliation for Providers

Cerner PowerChart EDUCATION

To complete the Discharge Medication Reconciliation, address all medications.

- Select Continue After Discharge or Do Not Continue After Discharge for each medication.
- Hospital medications () default to Do Not Continue After Discharge.
- Only select Create New Rx if a prescription is needed from a listed home () or hospital medication ()

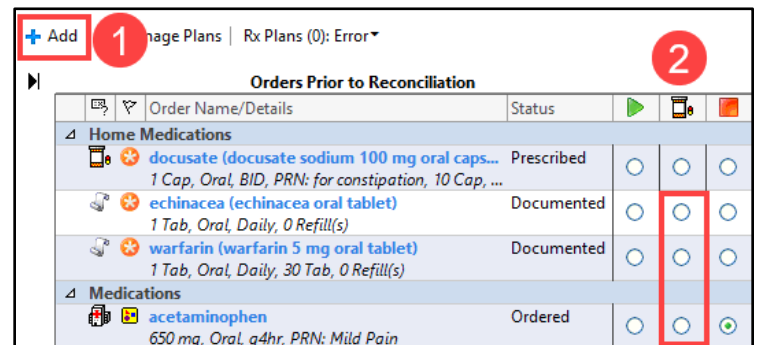

Adding a New Prescription

To add a new prescription:

1. Click **Add** to search and add a new prescription.

OR

2. If a prescription is needed from a listed home or hospital medication, select the **Create New Rx** option (middle column) next to the medication.
 - a. Complete missing prescribing details by clicking on the icon.

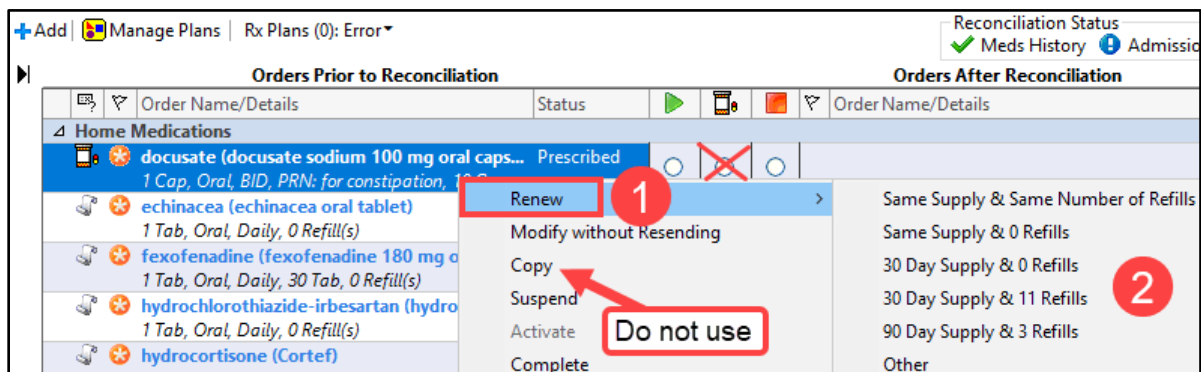

Renewing a Prescription

To renew a prescription that has been previously prescribed:

1. Right click on the prescription and select **Renew**.
 - a. Do NOT copy previous prescriptions.
2. Select a supply and refill amount, or select Other, and complete the required fields.

Do **NOT** use the **Create New Rx** option (middle column) for a prescription.

When completing the required prescription details, select the patient's preferred pharmacy in the Send To: field and complete the ordering process to ePrescribe the medication. For more details on how to ePrescribe medications, please review the education document, **ePrescribe Medications**, on the [Clinical EHR Website](#).

NOTE: All continued and new Rx medications appear on the discharge medication list for the patient.
