

Family History Overview for Providers and Clinical Staff

Cerner PowerChart Ambulatory EDUCATION

Histories Component

1. Navigate to the AMB Specialty Workflow.
2. Click on the Histories component.
3. Click on the Family tab.
4. Select a family member or condition row to open the detail pane.
5. The most recently submitted comment is displayed at the bottom of the detail pane. If there are other documented comments, click Show All to display.

Managing Patient Requests

Complete the following steps to add or decline patient requests to add family history items (the process is the same from either the Condition View or the Family Member View):

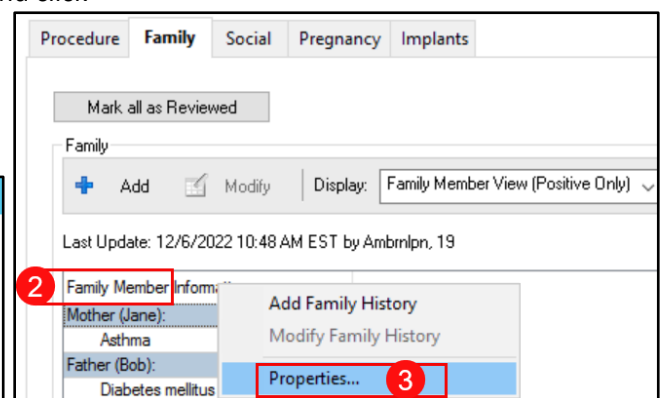

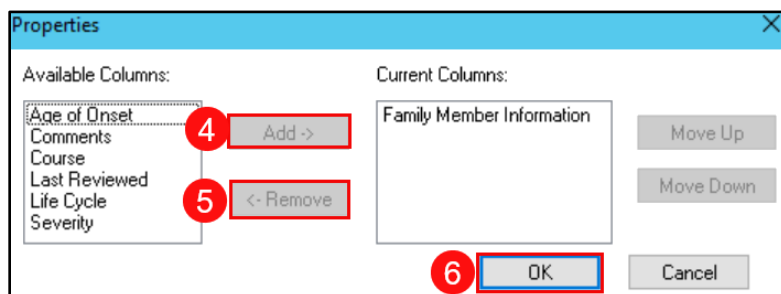

- The system displays the existing data in the Verified Local Record Data section and pending patient requests in the Unverified Data From Outside Sources section.
- To accept the suggested family history item, click Add.
- To eliminate the suggested family history item, click Decline.

Note: If the patient adds a family history item from a version of the patient portal older than HealthLife 1.1, the system does not display the Add or Decline options; instead, the Acknowledge option is displayed.

Changing the Column Display

To change the column display:

1. Click on the Histories hyperlink while the Family tab is selected.
2. From the Family tab right-click on Family Member Information.
3. Select Properties.
4. From the Available Columns list, select desired columns and click Add.
5. To remove a column, select it from the Current Columns list and click Remove.
6. When finished, click OK.

Marking Family History

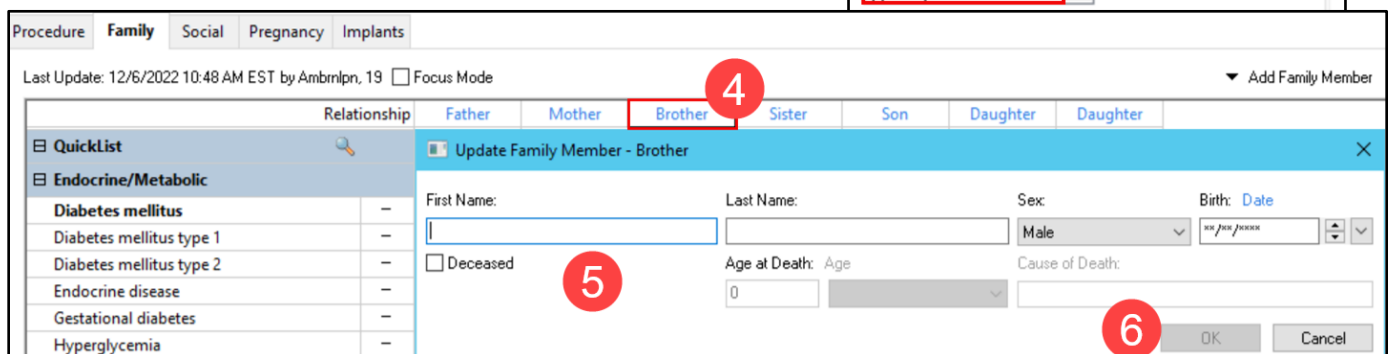

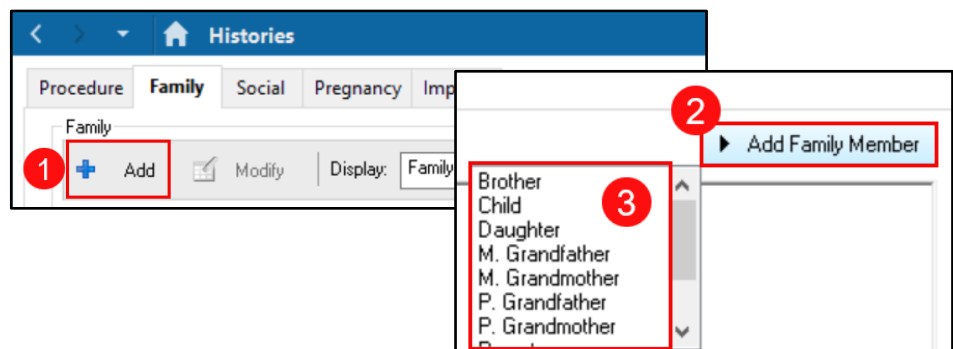

1. Select one of the following:
 - a. Negative: If the patient's family history is negative the Negative box can be checked.
 - b. Unable to Obtain: Use Unable to Obtain for cases in which the patient is incapacitated and no one knowledgeable is available to supply any family medical history.
 - c. Unknown: Use this option if the patient's biological family history is unknown.
 - d. Patient Adopted: Use this option when the patient's family history is unknown due to adoption.

Adding Family Members

To add a family member:

1. Click + Add.
2. Click Add Family Members.
3. Select the relationship to the patient to add.
4. Click on the desired Relationship hyperlink.
5. Complete appropriate fields.
6. Click OK.

7. Click on the drop-down arrow in the Health Status row to select the family member's history as Negative or Unknown.
