

## MAR Summary

The MAR summary is a high overview of medication administration.

- Four days of data displays; 1 day in the future, the current day, and 2 days in the past.
- Time columns display 24 hours of data; 0000-2359.
- Medications are listed alphabetically in the categories of Scheduled, Unscheduled, PRN, and Continuous Infusions.

Yellow indicates today.

A red cell indicates medication is overdue. The alarm clock also indicates overdue.

Medication has been given. The time administered is listed in the cell.

A light blue cell indicates medication has not been given. The due time is listed in the cell.

A green cell indicates a PRN medication.
