

Microbiology Component for Providers

Cerner PowerChart and Ambulatory EDUCATION

Overview

The Microbiology component in the AMB and Manage Specialty Workflows within the Provider View allows providers to view microbiology results for a patient.

Microbiology Component

To view microbiology results:

1. Navigate to the Microbiology component in the workflow.
2. Select the desired timeline filter for results to display.
3. Details are displayed in the various columns and can be selected to adjust the list order.
 - a. Click on the pill icon in the Susceptibility column to open the susceptibility report.
4. Click the microbiology test hyperlink to view the result details in a separate window.
 - a. **Note:** Providers are unable to Tag items in this component and must use Ctrl-C to copy and then Ctrl-V to paste into the dynamic documentation note.

	Susceptibility	Growth/Result		Last Updated	Status
Sputum Culture		POS	00	JAN 05, 2021 15:35	Completed
