

CareAdmin: Nurse Review Alert

Cerner PowerChart and FirstNet JOB AID

Nurse Review Alert

The Nurse Review alert will fire anytime a medication has been scanned and has not been reviewed by a nurse.

1. If a nurse receives this alert, they will be able to select 'Yes' and review that medication which will allow administration and documentation of the medication.

2. If a student nurse receives this alert, they will not be able to administer and document the medication until a nurse has reviewed the medication.
