

## Readmission Prevention Dashboard and Worklist for Patient Care Managers

Cerner PowerChart EDUCATION

The Readmission Prevention Dashboard and Worklist provide a population view of patients at risk for readmission instead of a single chart view. Worklists can be created with many filter options to view specific categories of interest.

1. Click on the **Readmission Worklist** hyperlink on the UR/ Transition Planning Worklist.

2. The **Filters** window opens to allow creation of patient lists based on selected filter options.

3. The **Readmission Worklist Dashboard** displays after creating lists with filter selections. The Care Manager can filter on dashboard widgets to create a worklist.

- a. Readmission Risk displays the number of patients who fall into high, moderate, and low risk categories.
- b. **Risk Factors** groups patients according to diagnosis. One can also view 30-day readmissions, manually added patients, and BOOST factors.
- c. Payor displays patients based on their payor.
- d. Follow Up Phone Calls Due displays the number of discharged patients requiring follow-up phone calls.
