

Transition of Care Survey

The Transition of Care Survey is documented on the Discharge Disposition TOC form when there is a mismatch between the Transition of Care (TOC) recommended by the Readmission Prevention Solution, and where the patient is actually being discharged to when leaving the hospital (TOC Actual).

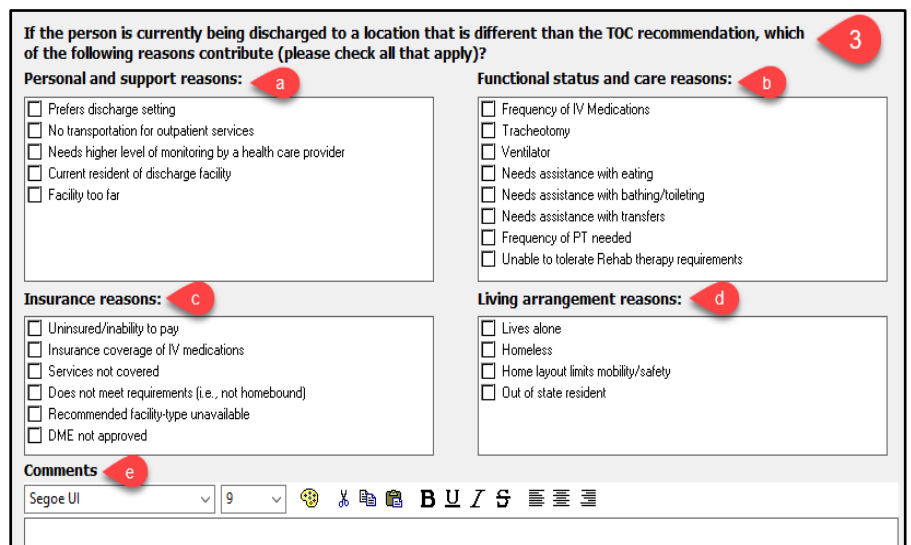

1. From the patient's chart, select AdHoc from the Toolbar.
 - a. Select Discharge Disposition TOC
 - b. Click Chart. The form will populate on the pop-up menu

2. The first portion of the form has drop down boxes for quick selections:
 - a. Readmission Prevention Solution Model Recommendation
 - b. Discharge recommendation by the healthcare team/Care Manager
 - c. Actual discharge location

3. The second portion of the form allows for documentation of contributing data related to:
 - a. Personal and support reasons
 - b. Functional status and care reasons
 - c. Insurance reasons
 - d. Living arrangement reasons
 - e. Additional comment box for free text

4. Once the form is completed, sign with the green checkmark located in the upper lefthand corner
5. The documented Discharge Disposition TOC form will populate under Clinical Notes
