# Warfarin Components in the Primary Care Workflow for Providers

Cerner PowerChart Ambulatory **EDUCATION**

Viewing the Warfarin Components

Warfarin Components are available on the Primary Care Workflow Page.

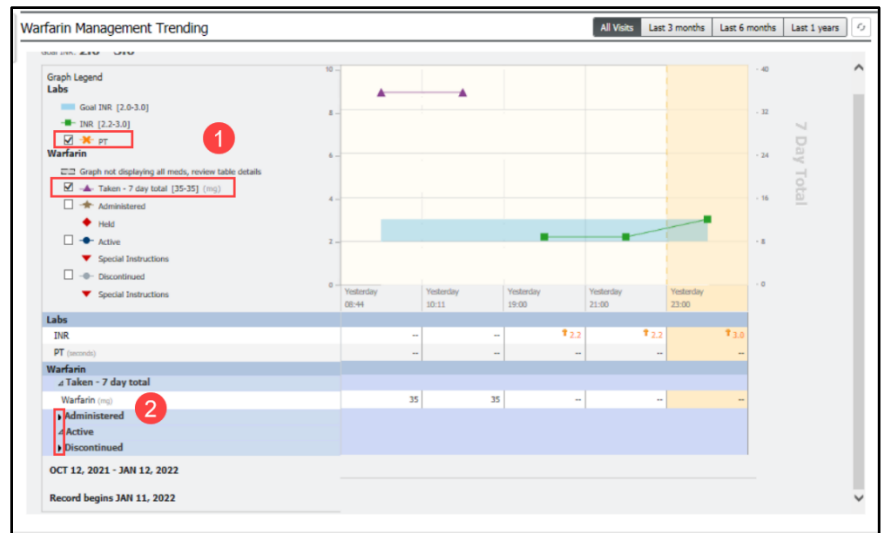

Warfarin Management Trending

To be used as a tool to view patient INR and warfarin dose trend.

Setting Recommendations:

1. Unselect all check boxes except PT under Labs and Taken under Warfarin.
2. Collapse the table view under Warfarin for Administered, Active, and Discontinued by clicking on the triangle next to the titles.

> **Note**: If viewing the Active Warfarin information, this will show the last updated prescription on the patient medication list. It does not pull information from the anticoagulation PowerForm.

Warfarin Management

The Warfarin Management Trending component of workflow is meant to be used as a tool to view INR values and active Warfarin prescriptions.

1. Units shown are reflected from active prescription signature.
2. Clicking on the header will take you directly to the Anticoagulation flowsheet in Results Review.
