

Selecting an Assignable Role

Assignable roles allow shift based users to take on a specific role during the login process. They will remain in the role until they end their shift. The role can apply settings, add the user to a paging group, add the user to a department, or apply patient filters so that they only see patients within their department.

- 1. Sign into the Telmediq application (web or mobile)
- 2. Select the role from the Assume Roles list.

Assume Roles						
Yo	u are cu	rrently able to assume the following roles:				
C		Name				
8	2	12N HUC				
C		4W HUC				
			Skip Assume Roles			

Change an Assignable Role

- 1. Select your name in the top right corner.
- 2. Select the **Assumed Roles**.
- 3. Choose a role from the Available Roles list.
