

Required ICD-10 Data Elements for Orders/EMR Templates

Primary Care Physicians

- **Acuity**
 - Acute
 - Chronic
 - Acute on Chronic
- **Type**
 - Recurrent, paroxysmal, persistent
 - Organism
- **Laterality**
 - Bilateral
 - Left
 - Right
- **Side of dominance – cerebral infarction**
 - Right
 - Left
 - Ambidextrous
- **AMI**
 - Age definition for AMI has changed to four weeks rather than eight weeks
 - New categories for subsequent AMI and for complication within 28 days of AMI
- **Pregnancy**
 - 1st trimester – less than 14 weeks, 0 days
 - 2 trimester – 14 weeks 0 days to less than 28 weeks 0 days
 - 3rd trimester – 28 weeks 0 days until delivery
- **Diabetes**
 - Emphasize type (Type 1 or 2)
 - Diabetes mellitus due to underlying condition
 - Body system affected, complication, or manifestation
 - Drug or chemically-induced
 - Document the use of insulin
- **Chronic Skin Ulcer, Non-Pressure**
 - Ulcer depth: skin breakdown, fat layer exposed, muscle necrosis, bone necrosis
 - Causal condition
- **Asthma**
 - Mild, moderate, severe
 - Uncomplicated, w ac exacerbation or status asthmaticus
 - Intermittent, persistent, exercise-induced bronchospasm, cough variant
- **Episode of Care**
 - Initial encounter
 - Subsequent encounter
 - Sequela (previously known as late effect)

- **Fractures and Wounds**
 - Episode type for closed v open fracture
 - Site specific
- **Anatomic specificity is a must!**
 - Finger – Individual fingers and phalanxes
 - *Non-displaced fracture of proximal phalanx of left index finger, initial encounter for closed fracture S62.641A*
 - Toe – individual toes and specific joints
 - *Dislocation of interphalangeal joint of right great toe, initial encounter S93.111A*
 - Hand – individual metacarpals
 - *Displaced fracture of base of second metacarpal bone, right hand, initial encounter for closed fracture S62.310A*
 - Foot – individual metatarsals
 - *Non-displaced fracture of third metatarsal bone, right foot, initial encounter for closed fracture S92.334A*
 - Eyelid – upper vs. lower
 - *Abscess of right upper eyelid •H00.031*
- **Circumstances of drug/medication event**
 - Accidental
 - Intentional self-harm
 - An assault
 - Of undetermined cause
 - An adverse effect of a medication
 - Due to under-dosing of a prescribed medication (new to I-10);
 - *under-dosing intentional or not*
 - *intentional – reason why patient is not taking medication (e.g., financial reasons)*
