

Storefront: Android/Phone/Tablet Install Instructions

Disclaimer:

To promote community health during the outbreak of COVID-19, Munson Healthcare staff whose job duties do not require them to be on-site will be provided with solutions to work from home. For staff who do not already have a Munson-provisioned workstation with Checkpoint VPN, Storefront access is available.

If there is a legitimate business reason why these standard are not viable options in the short term, an IS may provide an alternative access method. The safety of Munson Healthcare workforce members, patients, and their data is a priority and as such, temporary remote access measures will be revoked once operations return to normal.

For more information see Munson's Information Technology Access Control Policy.
