COVID-19 (also known as new coronavirus)

Preventing Infection: Protecting Patients and Our Healthcare Team

For your safety, and the safety of our patients, visitors and Healthcare Team, everyone in our facility must now wear a face mask. All patients and visitors will receive a mask and paper bag as they visit our screener station. The paper bag is to store your mask when you are not wearing it.

- At the screener station, sanitize your hands and put on your face mask. If you are a returning visitor, please sanitize your hands before taking your mask out of the bag and sanitize your hands after you put the mask on your face.
- FOR PATIENTS: Wear the mask at all times while in a waiting area or when anyone is in your room. You may take the mask off when you are alone in your room. When taking your mask off, place your mask in your bag and sanitize your hands. To put the mask back on, sanitize your hands, take it out of the bag, put the mask back on your face, and sanitize your hands again.
- FOR VISITORS: Wear the mask at all times during your visit except when eating or drinking. When taking your mask off to eat or drink, place your mask in your bag and sanitize your hands. After you are done eating, sanitize your hands before taking it out of the bag, put the mask back on your face, and sanitize your hands again.
- Do not wear your mask around your neck or pull it under your chin or nose at any time, including while eating or drinking. If you need to take it off to eat or drink, put it in the paper bag and sanitize your hands as you put it on and take it off. Maintain a social distance of 6 feet when your mask is not on.
- When leaving the facility, remove your mask at the screener station, put the mask back in your bag and sanitize your hands. If you are coming back, please bring your mask with you for each visit and put it on at the screener station.
- You may bring your own face mask from home as long as it is clean and not ripped.

Please remember: you must wear the mask at all times during your visit except when eating or drinking. Thank you for doing your part to keep your facility safe!
