ANNOUNCING:
LIVE WEBINAR PRESENTATION
“Management of Bone Health in Oncology Patients”
12:00 p.m. – 1:00 p.m. CST | Thursday, January 20, 2022

Target Audience: Pharmacists & Nurses
CE Credit: Approved for nurses, pending for pharmacy
Fee: None | Live contact hour: 1.0

Program Summary
Cancer is a major risk factor for bone loss and fractures in patients due to direct effects of cancer cells on the skeleton and to deleterious effects of cancer-specific therapies on bone cells. Several treatments have emerged in recent years to help manage and conserve bone health in oncology patients. This program seeks to review these agents in detail by discussing their efficacy and safety as well as reviewing the pathophysiology and risk factors behind cancer and bone health.

Learning Objectives for Pharmacists & Nurses
At the end of this session, participants should be able to:
1. Recall the etiology and pathophysiology of bone health complications in oncology patients
2. Identify patient and cancer therapy related risk factors, diagnosis, and clinical presentation for bone complications.
3. Recognize various pharmacologic and non-pharmacologic options to manage bone complications in cancer patients.

Presenter:
Krishna Patel, PharmD
PGY1 Pharmacy Resident
Robert Wood Johnson University Hospital

This activity is eligible for ACPE credit; see final CPE activity announcement for specific details.
