

Cerner PowerChart Ambulatory EDUCATION

Summary: It is recommended that patients aged 18 years and older seen during the measurement period be screened for high blood pressure and a recommended follow-up plan is documented, if blood pressure is elevated or hypertensive.

When: Effective immediately.

Support: Ambulatory Informatics at 231-392-0229.

Clinical Staff Documentation

Ambulatory Intake Workflow – Intake Summary:

The patient's blood pressure must be recorded during patient intake. To record blood pressure for adult patients, follow the steps below:

1. Click the down arrow next to Vital Signs and select the intake PowerForm.

Vital Signs		+ V All Visits Last 12 month
	Today	LVAD Interrogation
Temp DegC		Ambulatory Comprehensive Intake

2. The PowerForm opens to the Intake Summary. Scroll down to the Vitals section. Blood pressure is recorded here:
