

CareAdmin: IV Rate Change Documentation for Nurses and Clinical Staff

Cerner PowerChart and FirstNet EDUCATION

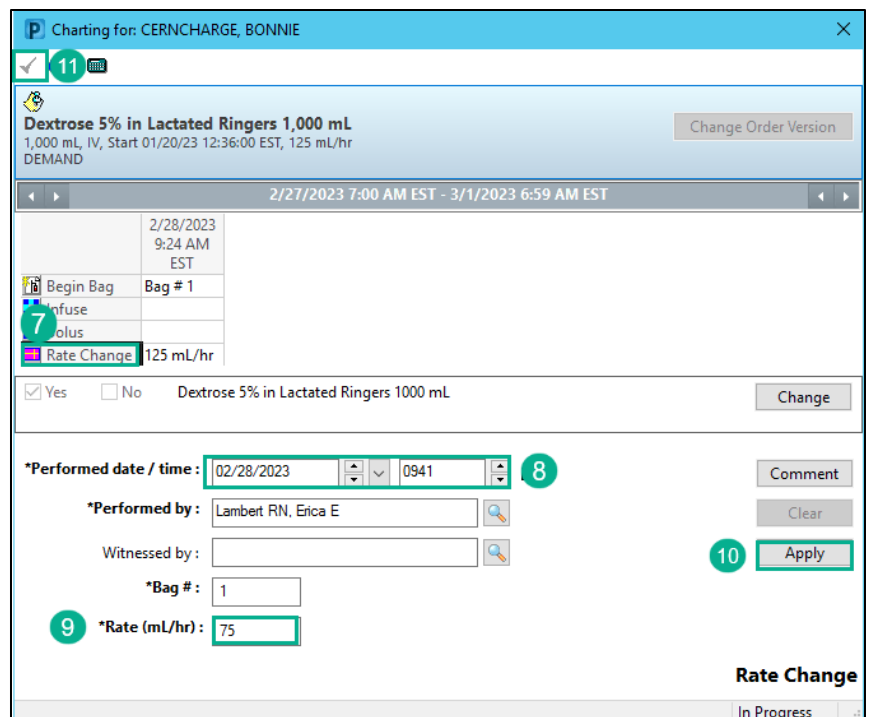

Note: All IV rate changes are documented in either Interactive View or MAR. Scanning an IV bag will ALWAYS document it as a Begin Bag.

Interactive View: IV Rate Change Documentation

1. Open patient's chart with bedside computer to Interactive View – Intake and Output band.
2. Verify patient's identity with name and date of birth.
3. Change the rate on the IV pump after verifying the order.
4. Document the rate change in the Intake and Output band.
5. Right click on IV requiring rate change.
6. Select Chart Details.

7. Select Rate Change.
8. Verify or change as needed the correct date/time of the rate change.
9. Enter the new rate if pharmacy has not already completed that step.
10. Click Apply.
11. Click the checkmark to sign charting.
