Munson Healthcare Vaccine Update

- Munson Healthcare’s current vaccine supply is already allocated to those currently scheduled for an appointment.
- If you received your first dose from Munson Healthcare, you will be able to receive your second dose at your scheduled time.
- We are not scheduling any additional first dose clinics.
Munson Healthcare Vaccination Efforts

• As of February 9, MHC has administered **24,979** vaccines.
• **64.3%** of Munson Healthcare workers are now vaccinated.
At least 32.6 million people have received one or both doses of the vaccine in the U.S.

This includes more than 9.7 million people who have been fully vaccinated. 59.3 million doses have been distributed.
Michigan Vaccination Efforts

Doses Administered on 2/6 & 2/7
30,987

Total Vaccines Distributed
2,022,250

Vaccines Distributed on 2/7
4,200
New virus variants that spread more easily could lead to a rapid rise in COVID-19 cases

NOW, more than ever, it is important to slow the spread

- Viruses constantly change through mutation, and new variants of a virus are expected to occur over time.
- The virus that causes COVID-19 is known to acquire, on average, one new mutation every two weeks.
- Some variants may be more transmissible, or less responsive to vaccines - so it is important to avoid exposure.
- People traveling to Michigan and those who may have been exposed to the new variant should quarantine for 14 days (without the option to end quarantine early) and also get tested.

Wear a mask
A face shield may be worn over a mask for extra protection

Stay at least 6 feet apart

Avoid indoor gatherings

Get tested

Get vaccinated when available to you
Health Department Updates
Thank you.
