Editing Education

- Once the education has been selected, the education will move to Added Education.
- 2. To modify the education, click on 'Modify'.

3. This will bring up the previous patient education screen where edits can be made via the word processor.

To save your changes click 'Sign Pt Education'.

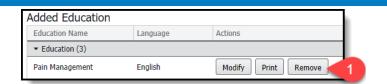

If you would like to remove an education, click on the red X.

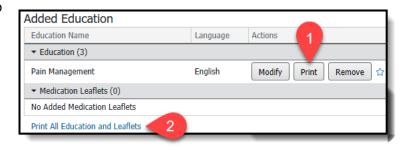

Removing Education from Patient Education Screen

 To remove the education, go to Added Education section and click 'Remove'.

Printing Education

- From the Added Education section select 'Print' to the right of each education. This will print the instructions individually (recommended).
- 2. Selecting the 'Print All Education and Leaflets' hyperlink will print all the education together. Avoid selecting the Print All Education and Leaflets hyperlink as multiple education topics can be on the same page and result in confusion for the patient.

Note: Patient education documents appear in the patient portal for viewing after discharge.

Previous Patient Education Format

If you would like to use the previous Patient Education format

- Select the drop-down arrow and click 'Add New Custom Education'.
- **2.** You will be taken to the previous patient education format.
