

Patient Status Change

The **status column** in LaunchPoint can only move forward in hierarchy.

To “restart” the status assignment users must manually cancel previous statuses using the Set Events option. **Example:** Discharge orders entered in error and discontinued, however, the LaunchPoint status column will still display Discharge until the event is manually canceled.

1. In LaunchPoint, right click anywhere on the patient row to open the shortcut menu.
2. Select Set Events.
3. In the Set Events window select, Automated.
4. Search for the Events that no longer apply. i.e., Rdy to Adm & Floor Orders Entered.
5. Using the drop-down arrow, change the Status to Cancel for each applicable event.
6. Click Ok.

Event	Type	Status	User
Floor Ord Entered	Events	Cancel	Mack RN, Lindsey
Rdy to Adm	Disposition	Cancel	Mack RN, Lindsey
Urine Collect	Patient Care	Request	Hess MD, Rebecca A
Pending Lab	Pending Lab	Request	Hess MD, Rebecca A
Nurse Collect	Patient Care	Request	Hess MD, Rebecca A
EKG	Patient Care	Request	Hess MD, Rebecca A

7. The LaunchPoint Status will now reflect last active Status and will move forward with any future status assigned.

Rdy to Admit and Floor Orders Entered Events Canceled; the status now displays Eval in Progress
