Project ECHO for Perinatal Substance Use Disorder

Project ECHO® Saginaw Valley State University is a program with a focus on Perinatal Substance Use Disorders including treatment, recovery, intervention and prevention for women who are pregnant. This learning opportunity is designed for any healthcare provider, mental health or substance use disorder professional, social worker, peer recovery specialist, administrator or student with interest in the program topics.

**What does the Perinatal Substance Use Disorders ECHO provide?**

This ECHO provides training in perinatal substance use disorders at no cost, delivered right to your clinic, with a monthly schedule for your convenience. Using simple videoconferencing technology, healthcare teams connect to a community of learners which offers:

- Free continuing education credit from MidMichigan Health*, Saginaw Valley State University**, and MidState Health Network***
- Opportunity to present actual patient cases, in a de-identified format, and receive specialty input
- Addiction treatment training, including management of buprenorphine/naloxone (e.g. Suboxone) and injectable naltrexone (e.g. Vivitrol)
- Access to a virtual learning community for access to treatment guidelines, tools, and patient resources

**Session information**

SVSU PERINATAL SUD ECHO is held monthly on the second Wednesday of each month from 12:00 pm– 1:30 pm EST. See reverse for schedule.

**Meet the team**

William Morrone, DO, MPH, MS, FAOAAM, ASAM, FACOPF, DABAM, DAAPM, Addictionologist
