## Munson Healthcare Provider Labor Pool

Munson Healthcare is developing a Provider Labor Pool in order to ensure appropriate deployment of provider resources to meet clinical demands throughout the COVID-19 pandemic. We are asking practice leaders to work with each of you to review your schedules and identify time you will be able to dedicate to the pool.

Although we need to build this Labor Pool, it's crucial we do not take you away from important clinical work that is part of your normal clinical duties. Our goal is to build efficiencies into your clinical schedules in the event you are needed elsewhere.

We have created an [intake form](#) that your office manager will complete. The data points will allow us to better match your expertise with emergent needs. The Provider Services team is working very closely with leaders of the Physician Network and physician leaders from across the region throughout this process.

We will continue to communicate with you as the pool and situation evolves.

Please work with your practice manager to review your clinical schedule and identify ways in which you could contribute to the pool.
