

Cerner PowerChart Ambulatory EDUCATION

Summary: Colon Cancer Screening is now recommended for all patients ages 45 - 75 and will display on the Recommendations Component within the Ambulatory Workflow. To satisfy requirements to meet quality measures for colon cancer screening, one of the following needs to be completed within the Recommendations Component:

- Fecal Occult Blood POC or Fecal Immunochemical Test (FIT) POC ordered
- Cologuard Transcribed Result entered
- Colonoscopy
- Colectomy documented or exclusions to Colon Cancer Screening documented

Fecal Occult Blood or FIT POC Order

Provider or Clinical Staff:

- Navigate to the Colon Cancer Screening within the Recommendations Component on the Ambulatory Workflow.
- 2. Click Orders.
- 3. Select the appropriate Order.
- On the Ordering Physician screen, choose Order, enter the ordering provider's name, and select Cosign Required as the communication type. Click OK.
- 5. Click the Orders for Signature icon.
- Associate the diagnosis Z12.11 Colon cancer screening to the order and click Sign.
- 7. The Colon Cancer Screening will now be available in the Not Due/Historical tab of the Recommendations Component.

Once the patient returns a completed Fecal Occult Blood Test or FIT test, complete the following steps. (If results are received by other means, proceed to next section below).

Office Staff:

- 1. Schedule the patient for a Nurse Visit.
- 2. Check patient in for the Nurse Visit.
- 3. Deliver the returned fecal occult blood/FIT card to the appropriate clinical staff.

Clinical Staff:

Clinical staff receives the fecal occult blood/FIT card and documents the results.

- 1. Locate the patient on the Nurse Visit Schedule in the Ambulatory Organizer.
- 2. Open the patient's chart and navigate to Order Profile on the Ambulatory Workflow. Click on **Order Profile** to access orders.
- 3. Right-click on the **POC order** and select **Activate**.
- 4. Navigate to the patient's Task List and click on the **Stool Studies POC Task**.

Exclusions to Colon Cancer Screening

Exclusions to colon cancer screening include a history of malignant neoplasm of large intestine or a history of malignant neoplasm of rectum, rectosigmoid junction and anus. These exclusions must be documented along with the colectomy procedure.

Problem List

Priority

4 🗸

When a Colectomy Result is received: Add the exclusion to the Problem List:

Add the exclusion to the Problem List:

- Navigate to the **Problem List** on the Ambulatory Workflow.
- 2. Review the Problem List to determine if one of the following exclusions is listed as a Problem. If so, select **This Visit**.

Problem Name

History of malignant neoplasm of large intestine

 If the Problem is not on the Problem List, search for and select the appropriate problem: History of malignant neoplasm

Problem List		3
Classification Medical and Patier V	Add as This Visit and Chro 🗸	History of malignant neoplasm of large intestine
	History of n	nalignant neoplasm of large intestine (Z85.038)

Code

Z85.038 (ICD-10-CM)

of large intestine (Z85.038) or History of malignant neoplasm of rectum, rectosigmoid junction and anus (Z85.048). Select Add as This Visit and Chronic.

• Clinical staff may add the diagnosis code initially if known. Providers are responsible to add the diagnosis code to subsequent annual visits.

Recommend

Recommendation

Colon Cancer

• If clinical staff is uncertain of the correct diagnosis to add, check with the provider.

Update Procedure Histories from Recommendations:

- 1. Select Colon Cancer Screening from the Recommendations Component.
- 2. Click Actions.
- 3. Select Procedure: Colectomy.
- 4. Enter the complete date of the procedure.
- 5. Remove the name from the Physician field by clicking on the **X**.
- Update the Physician to the performing provider (if known) and any additional information available. If unknown, this field may be left blank.
- 7. Click Save.
- 8. Colon Cancer Screening will now be removed from Recommendations and Colectomy will be added to Procedure Histories.
