Changes to Thyroseq molecular thyroid test collection starting May 6st 2024

In an effort to improve patient care through FNA procedure reduction, all FNA thyroid pathology will have a Thyroseq molecular test collected starting May 6st 2024. Samples will be held in the Cytology laboratory at Munson Medical Center and are stable for 3 months.

For thyroid cytology results in which the addition of molecular testing may be helpful for patient management, please fax a laboratory requisition to Pathology at 231-935-7528 for processing.

Some insurances require prior authorization for molecular testing. If your patient's insurance requires prior authorization, include prior authorization with requisition when faxing to laboratory.

Thyroseq results will still be faxed directly to the ordering provider and MMC laboratory from CBLPATH. MMC Laboratory will upload results into the patients EMR.

Please reach out to the laboratory directly with any questions or concerns.
