

# Labs Component Overview for Providers and Clinical Staff

## Cerner PowerChart Ambulatory EDUCATION

### Labs Component

Navigate to the Labs Component within the Workflow in Provider view or Nurse view.

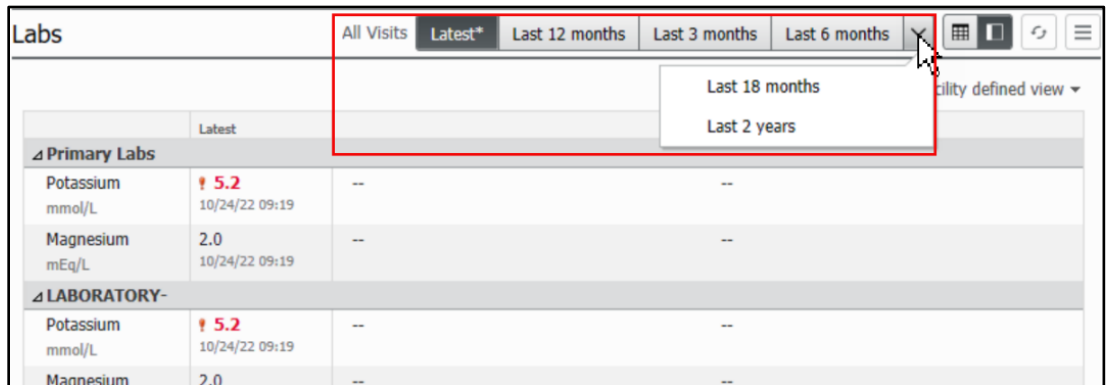

Lab results can be viewed by flowsheet or table view by clicking on the appropriate icon.

### Filtering Results by Look Back Range

To filter lab results:

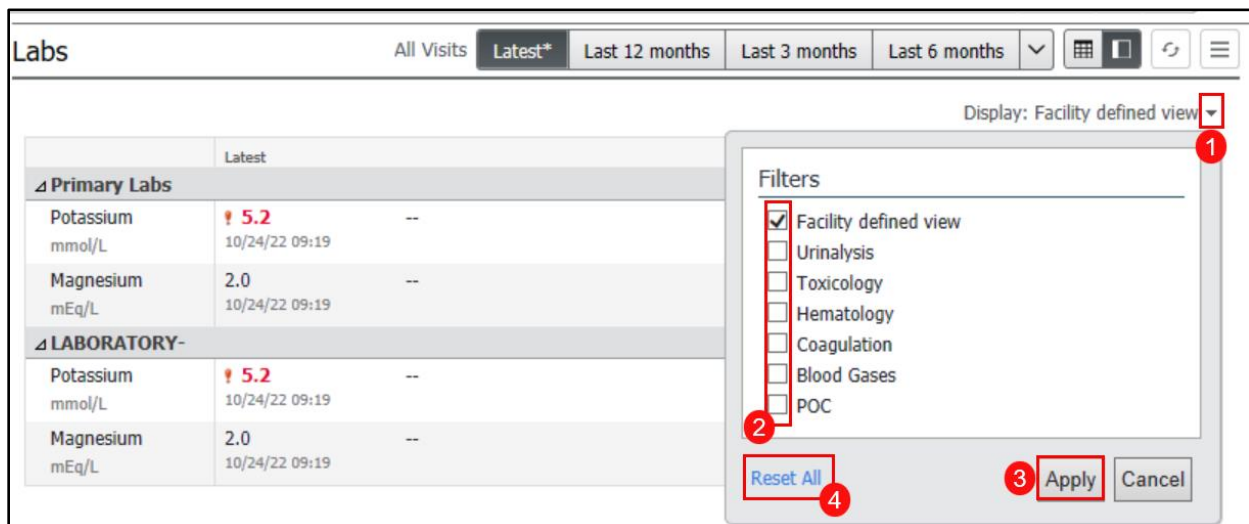

- Click the desired date range.
- For additional date ranges click the down arrow.

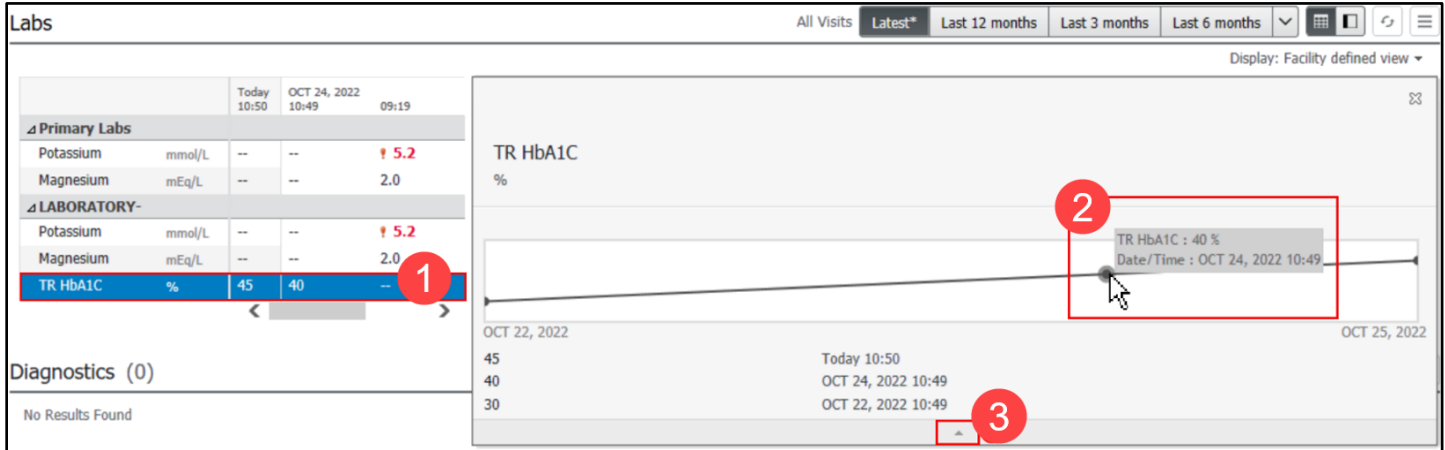

### Filtering Lab Results by Specialty Group

To filter lab results by speciality group:

1. Click the down arrow for filter options.
2. The Facility defined view will be auto selected, additional filters can be added.
3. Click Apply.
4. Select Reset All to return to the default settings.

### Using the Details Pane in the Ambulatory and Flowsheet Views

- Click on the desired lab and a graph will display.  
**Note:** If any of the results are excluded from the graph due to a different unit of measure than the most recent value or non-numeric results, an error message will display.
- Hover over a specific data point to see the Date/Time.
- Expand or collapse the view by clicking on the arrow.

### Using Result Details

- Click on the desired result.
- Select the lab value to open the Result Details pop-up.
- Click Trend to see a list of prior results.
- Click on Forward, Print, or Close as indicated.

Lab	Unit	Value	Date/Time
Potassium	mmol/L	↑ 5.2	10/24/22 09:19
Magnesium	mEq/L	2.0	10/24/22 09:19

### Forwarding Results

To forward a result:

1. Select Sign or Review.
2. Enter the desired name in the To: box, press enter, and the Address Book will open.
3. Type a name and select the desired name from the list.
4. Click Add; up to five recipients can be added.
5. Click OK.

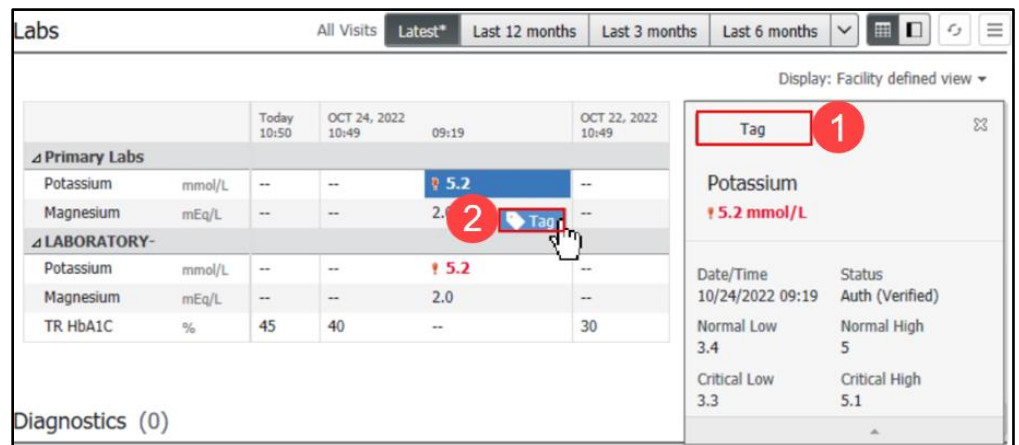

### Tag Results

To tag a result:

1. Click once on the desired result. Click on Tag from the tag view.
- OR
2. Right click on the desired result and click on Tag.

**Note:** To multi-select several results from any column or row, hold down the shift key and select multiple lab values.

3. To view tagged results, click the tagged button.
4. Click Remove All to clear the Tagged Items list.
5. Click on the X to remove an individual result.

**Note:** The most recent set of labs automatically pulls to the note. If the user tags a lab, it will automatically pull onto the note without the user having to drag and drop it into the note once the note is created.
