

Problem List Component Modification for Providers and Clinical Staff

Cerner PowerChart Ambulatory EDUCATION

Modifying Problem Details

The Workflow Problem List component allows modification of active and inactive chronic problems, the diagnosis for This Visit problems, and resolved problems.

To modify a problem on the Problem List:

1. Navigate to the Problem List Component and select a problem to open the detail pane.
2. If this problem will be addressed during this visit, select the This Visit button.
3. **Resolving a problem is a provider only function.**
4. Click on Modify to open the Modify Problem pop-up.

Note: If selected as a This Visit problem, any modifications made are associated with the diagnosis portion of the problem. If selected as a Chronic problem, any modifications made are associated with the chronic problem.
