

Procedure History Component Overview for Providers and Clinical Staff

Cerner PowerChart Ambulatory EDUCATION

Procedure History Overview

Procedure Histories for a patient are available to review and update at every visit or as needed from the Histories Component within the Ambulatory Workflow.

1. Select the Histories component in the Workflow.
2. Select the Procedure tab.
3. Review existing procedures for accuracy.

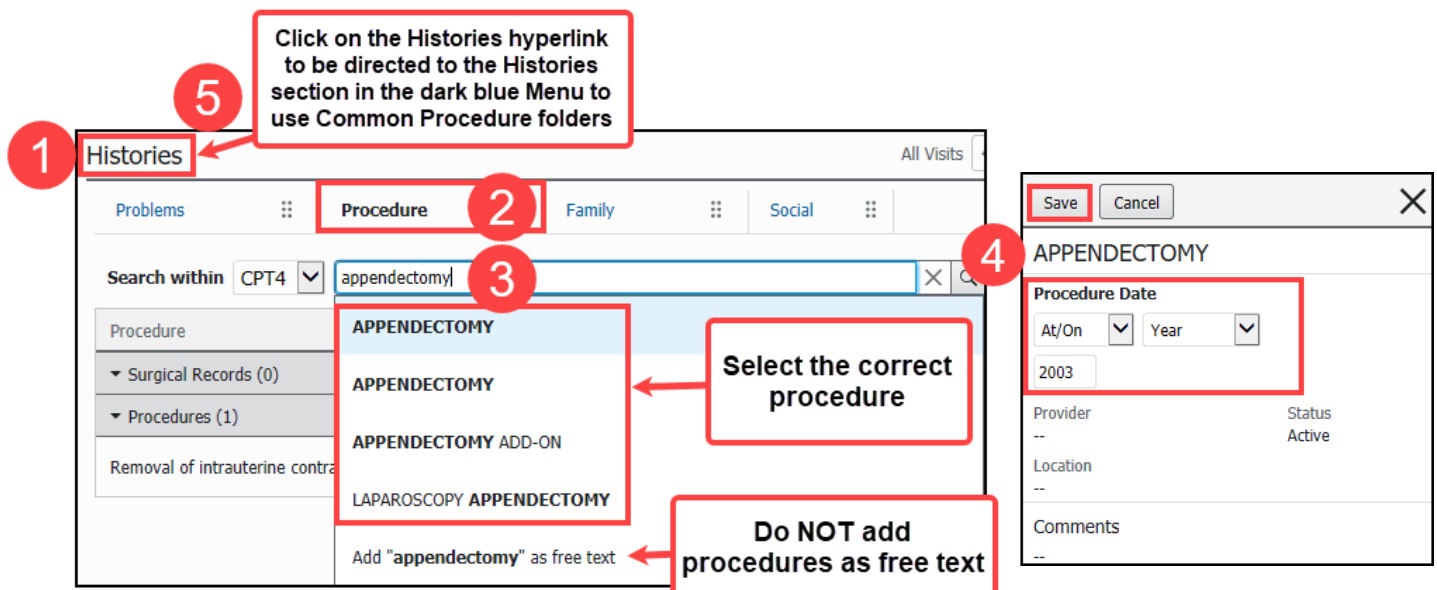

Adding Procedure Histories

To add Procedure Histories:

1. Navigate to the Histories Component within the Ambulatory Workflow.
2. Select the Procedure tab.
3. Type to search for the correct procedure. **Do NOT select Add as free text.**
4. Enter the Procedure Date and click Save.

OR

5. Click on the Histories hyperlink to access Common Procedure folders (recommended), then follow the steps for adding from Histories.
 - a. Refer to the document *Procedure Histories Additions* on the [Clinical EHR Education website](#) for more information.

Removing a Procedure

To remove a documented historical procedure:

1. Select the procedure.
2. Click **Remove**.

The screenshot shows the 'Histories' component with the 'Procedure' tab selected. A search filter for 'CPT4' is applied. The procedure list shows 'Removal of intrauterine contraceptive device' selected, with a red box and the number '1' next to it. The 'Remove' button in the top right corner is highlighted with a red box and the number '2'. The details pane on the right shows the procedure name, date, provider, location, and status.

Modifying a Procedure

To modify a documented historical procedure:

1. Select the procedure.
2. Click **Modify**.
3. Make the needed changes.
4. Click Save.

The screenshot shows the 'Histories' component with the 'Procedure' tab selected. The procedure 'Removal of intrauterine contraceptive device' is selected, with a red box and the number '1' next to it. The 'Modify' button is highlighted with a red box and the number '2'. The modification form is open, showing the procedure name, date, and provider. The 'Save' button is highlighted with a red box and the number '4', and the 'Date' field is highlighted with a red box and the number '3'.

Note: Additional modification options are available from the Histories section located on the dark blue PowerChart Menu.

Managing Patient Requests and CCD Information

The purple diamonds indicate that outside information has been added and needs to be reviewed.

1. Click on the procedure with the purple diamond next to it.
2. If the patient indicates that the information is accurate, click **Add**, and if not, click **Decline**.

The screenshot shows the 'Histories' component with the 'Procedure' tab selected. A procedure 'Vasectomy' is highlighted with a purple diamond. The 'Add' and 'Decline' buttons in the 'Outside Records' section are highlighted with green and red boxes, respectively. The 'YES' and 'NO' buttons are also highlighted with green and red boxes.
