

### Medication Reconciliation Completion

Follow the steps below to complete the Outpatient medication reconciliation.

1. Navigate to the Home Medication Component in the AMB Primary Care Workflow.
2. Click on **Outpatient** in the status bar to launch the Outpatient medication reconciliation.

3. Address each home medication: Select **Continue** (green arrow), **Prescribe** (pill bottle), or **Do Not Continue** (red square).
  - a. Leave blank and click **Acknowledge Remaining Home Meds** for any home medication that is not managed by you (ex: a PCP may leave Warfarin blank and choose this option instead if the Cardiologist managed the Warfarin).
  - b. Click **Do Not Continue Remaining Home Meds** if you want to have the patient stop the remaining medications on the list.
  - c. To add a new prescription, choose the **Add** (plus sign) option.
4. Click **Reconcile And Sign** when reconciliation is done.
